EXPERIENCE

MorFree Cleaning Solutions

Software Engineer

Nov 2024 to August 2025

- Designed, developed, and maintained internal business management systems using the Django and Laravel frameworks, resulting in streamlined workflows and improved efficiency for 20 employees.
- Integrated core business workflows such as client bookings, task tracking, and inventory management into a single platform, reducing reliance on spreadsheets and manual processes.

TECHNICAL SKILLS

- Languages: PHP, Python, JavaScript, Dart
- Frameworks: Django, Laravel, Vue, Nuxt, Flutter
- Software: Git, GitHub, Bitbucket, MySQL, Jira, CI/CD, Docker

PROJECTS

Jadoo

[Demo](#) | [Code](#)

- Jadoo is a beautiful, responsive travel landing web application page built with Nuxt 3 and enhanced with subtle motion. It targets conversion and visual storytelling for travel brands.

Fire Photos

[Demo](#) | [Code](#)

- Fire Photos is a photography portfolio built to be clean, immersive, and expressive. It combines motion effects with lightweight image handling to ensure stunning visuals and quick load times.
- It's built using Nuxt 3 with Nuxt Image for high-performance image optimization, Tailwind CSS and smooth animation sequences, and SEO and mobile friendly layout with fast content delivery
